*Your talent determines what you can do.
Your motivation determines how much you are willing to do. Your attitude determines how well you do it.*

ENTERTAINMENT

Games with James

By: James Walker, Staff Writer

Watch Dogs, one of the new titles coming out for current and next gen consoles this year. Watch Dogs is a large open world sandbox game, much like Grand Theft Auto, but you can hack into the city's Central Operating System to use to your advantage. By using your phone to hack into things around you, you'll be able to change lights on intersections to cause multi-car pileups, which can then be used to take cover from enemies or to make a gateway. Running low on cash? Hack into someone's bank account through their phone while they're right next to you.

The game is being produced by Ubisoft and will be similar to a blend with Assassin's creed and GTA. It's nice combination of parkour, open world, and modern day tech. It'll run on Ubisoft's Disrupt game engine and run at 30-60 FPS. It's said to be released sometime in December and be sold on all consoles, the Wii U, and PC. Unlike anything that's happened in my life, this game looks like it'll be both exciting and fun.

Rock

By: Cody Akins and Madi Taylor, Staff Writers

Does anybody out there like rock and roll as much as Madi and I do? We're here to talk about the latest rock going on. Pearl Jam just came out with a new album called Lightning Bolt with an awesome song called "Mind your Manners". This song has the speed of a tiger and the melody of a mad thrasher. Then we have Kings of Leon. They also have a new album out, it's called Mechanical Bull, and they have a song called super soaker. Its soft, but good enough to satisfy the rock star in your blood. We hope you guys enjoy rock and roll as much as we do.
